

Job Title: Magento Developer

Job Summary:

We are seeking a highly skilled Magento Developer to join our team. The ideal candidate will have hands-on experience in developing, customizing, and optimizing Magento stores, ensuring seamless functionality and performance. If you're passionate about e-commerce and have a strong technical background in Magento 2, we'd love to hear from you!

Key Responsibilities : Required Skills and Qualifications :

- Develop, customize, and maintain Magento 2 websites.
- Create and modify themes and modules for enhanced functionality.
- Integrate third-party APIs (payment, shipping, ERP/CRM, etc.).
- Optimize website performance and ensure smooth user experience.
- Identify and fix bugs, security issues, and technical problems.
- Keep Magento stores updated with the latest versions & security patches.
- Collaborate with designers, marketers, and developers to meet project goals.

Required Skills and Qualifications :

- IT background (Computer Engineering or related field preferred).
- 1 - 3 years of proven experience as a Magento 2 Developer.
- Strong knowledge of Magento 2 architecture, custom module development, and Magento APIs.
- Proficiency in PHP, MySQL, HTML, CSS, JavaScript, and jQuery.
- Experience with Magento theme customization and development.
- Knowledge of cross-browser compatibility and responsive web design.
- Familiarity with SEO best practices and performance optimization.
- Experience with Magento integrations (payment gateways, third-party APIs, ERP, etc.).
- Proficiency in Git version control and other development tools.
- Strong debugging, problem-solving, and optimization skills.
- Experience with PWA (Progressive Web Apps) in Magento is a plus.
- Familiarity with Agile/Scrum methodologies.
- Basic understanding of UI/UX design principles.

Work Location: Surat (Onsite only)

How to Apply:

- Email your resume to hr@dynamicdreamz.com.
- Use "Magento2 Developer Application – [Your Full Name]" as the subject line.
